SUMMARY

Software Engineer with a strong foundation in frontend development and modern web technologies. Proficient in React.js, Next.js, Angular, JavaScript, TypeScript, HTML, CSS, and responsive design principles. Skilled at building reusable components, integrating APIs, optimizing application performance, and collaborating within Agile teams. Dedicated to continuous learning, delivering high-quality solutions, and creating exceptional user experiences.

SKILLS

Html	Css	Javascript
Angular	Typescript	Tailwind CSS
MySql	Git	Wordpress
React	Next js	AWS
PostgreSQL		

EDUCATION

Marwadi University	2018-2022
B.Tech Computer Engineering	

WORK EXPERIENCE

Exito	Ahmedabad
Sr. Frontend Developer	Dec 2024 - Present

Payroll System:

Contributed to the development of a comprehensive Payroll SaaS platform, delivering both the React.js-based Admin Panel and the React Native Mobile Application to streamline HR and workforce operations. Developed and maintained core modules including Employee Management, Attendance Tracking, Monthly Attendance View, Check-In/Check-Out, Attendance Regularization, Shift Management, Leave & Holiday Management, Payroll Administration, and Biometric Device Integration with Geofencing. Built responsive, scalable, and reusable user interfaces with advanced features such as search, filtering, pagination, data import/export, role-based access, and real-time API integration. Focused on performance optimization, component reusability, seamless user experience, and cross-platform consistency while collaborating closely with backend developers and product teams in an Agile development environment to deliver a secure, scalable, and production-ready SaaS solution.

SportSkins WC26 – Sports Prediction Platform:

Developed the Admin Panel for the SportSkins WC26 sports prediction platform using React.js, React TypeScript, Redux Toolkit, Material UI, REST APIs, and Git. Built and maintained modules for tournament management, match scheduling, prediction configuration, leaderboard management, user entries, scoring rules, round management, and content administration. Integrated secure API communication, implemented reusable components, optimized application performance, and collaborated with backend developers to deliver a responsive, scalable, and user-friendly administrative dashboard for managing the entire tournament prediction system.

SaffireTradeWings(STW):

Designed and developed a smart trading web application for the Indian stock market, enabling real-time market analysis and trading operations. Built a responsive and scalable frontend using Angular 18, TypeScript, and Bootstrap 5 to deliver a seamless user experience across desktop and mobile devices. Integrated WebSocket technology for live streaming of stock prices, order updates, and market indicators with minimal latency. Leveraged RxJS for efficient asynchronous data handling and real-time state management. Collaborated with REST APIs to implement secure trading workflows, interactive dashboards, live charts, market trends, and order management features, delivering a high-performance trading platform optimized for speed, reliability, and scalability.

Encodedots Technolabs	Ahmedabad
Software Developer	August 2022 to October 2024

Gatherco:

Developed Gatherco, a tile purchasing platform that enables users to browse and purchase tiles through a seamless online experience. Implemented 50% upfront and full payment options to provide flexible payment methods. Integrated OTP authentication and ABN verification to ensure secure user registration and verification. Built the frontend using Angular, collaborated with backend services developed in Yii2 (PHP), and utilized MySQL for efficient database management, ensuring reliable performance and smooth handling of thousands of records.

Horselink:

Developed HorseLink, a horse buying and marketplace application featuring four subscription plans—Starter, Connected, Premium, and Teams—to support different user needs. Implemented OTP-based authentication for secure user registration and login. Built interactive features that allow users to browse, like, and engage with 100+ horse photos and videos, delivering a seamless user experience. Developed the frontend using Angular, integrated REST APIs with the backend, and optimized the application for search engines using Server-Side Rendering (SSR) to improve performance, SEO, and visibility.

Lucent Innovation	Ahmedabad
Software Developer	November 2021 to May 2022

E-commerce Pre-Order Application:

Developed a pre-order e-commerce application with secure user authentication, including login and registration functionality. Implemented a product notification system to keep users informed about product availability and updates. Built the application using Node.js, Redux, and Shopify, integrating REST APIs to deliver a seamless shopping experience. Managed real-time data synchronization between the frontend and backend, ensuring accurate product information, order updates, and high application performance.

Self-Employed	Remote, India
Freelance Software Engineer	Aug 2025 -Present

Worked as a Freelance Frontend Developer, delivering custom web solutions for clients in Dubai, Turkey, and India across multiple industries. Designed and developed jewelry websites for international clients in Dubai and Turkey, along with Tours & Travel, Wholesale Business, and Physiotherapy Clinic websites for Indian clients. Built responsive, SEO-friendly, and high-performance applications using React.js, Next.js, Angular, TypeScript, JavaScript, Tailwind CSS, and Bootstrap. Integrated REST APIs, implemented reusable UI components, optimized website performance, and ensured seamless user experiences across desktop and mobile devices while collaborating directly with clients to transform business requirements into scalable, production-ready web applications.
